

Wouldn't it be great if you could make your legacy applications interoperable with the latest FHIR Resources on private and public clouds from AWS, Azure and GCP?

## Exafluence FHIR Solution

You can with MongoDB's FHIR API Solution built with our Global Strategic Partner, Exafluence!

Leveraging MongoDB's JSON native format and the Exf Insights platform it's possible to speed your FHIR projects 40-60%.

The FHIR API solution supports custom extensions and both Batch and Real-Time requests via Kafka. Exafluence accelerates your Modernization Projects and brings deep MongoDB and healthcare expertise learned from building Mobile Member Portals, Population Health, EMPI and Healthcare Analytics solutions.
